

# ENDANGERED SPECIES

JUDIT MORENO  
IRENE ROMERO  
SARA BEN OMAR

-Species disappearing fast or very small population - not large enough to survive.

**Jackass Penguin**  
*Spheniscus demersus*

- 52,000 mature individuals.
- It was once the country's most common sea-bird.
- It lives off the coast of Namibia.
- Oil pollution threatens them.

**Loggerhead Turtle**  
*Caretta caretta*

- It lives in the Mediterranean Sea, Black Sea and Atlantic Ocean.
- Warmer temperatures could result in an excess of females.
- Sometimes they become entangled in fishing nets and drown.

**Spectacled Bear**  
*Tremarctos ornatus*

- Estimates of fewer than 3,000
- It lives in the forest-covered mountains in South America.
- It is still killed by poachers for its fur, meat and fat.
