

THE MAJOR WATER POLLUTANTS

Oxygen-demanding wastes

Water-soluble inorganic pollutants

Organic pollutant

Nutrients

Suspended sediment

Water-soluble radioactive compounds

CONSEQUENCES

HOW WE CAN PREVENT THAT

Birth defects

Unsafe Water

Death of aquatic life

Excessive growth of water plants

Dangerous compounds

Extremely dangerous to animals

Don't throw litter into rivers, lakes or oceans

Avoid using plastics as much as you can

Try to use natural cleaning products instead of chemical products
