## I. GENERAL GUIDELINES

This template for the 12th Conference of the International Marangoni Association (IMA12) shall be used for the preparation of the abstract when using  $\text{\LaTeX}$ . The class to be used is `revtex4`. The maximum length of the abstract for IMA12 is one page of size A4. It is not required to use section headings.

## II. FLOATS

Figures should be included using `\includegraphics` command. The use of color figures as in fig. 1 is encouraged, each figure not larger than 1Mb. The resulting PDF-File should not be larger than 3Mb.

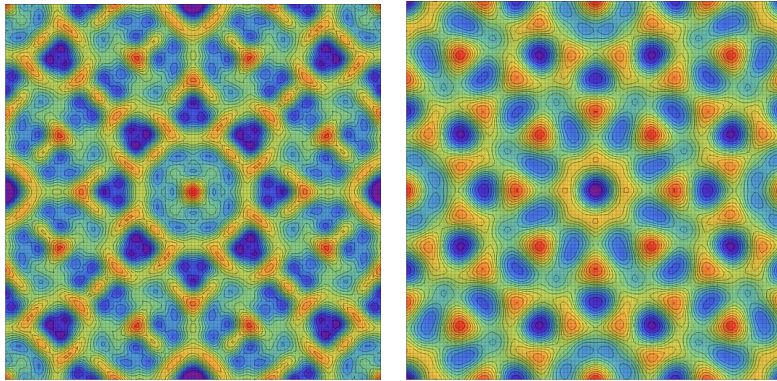

FIG. 1: An example of a figure caption. Left: A figure on the left; Right: A figure on the right.

## III. REFERENCES

References should be formatted using the `\thebibliography` environment such that citations in the text can be made using the `\cite` command. See the examples below [1, 2] for the citation style.

- 
- [1] U. R. Nothing, I. M. Nobody and B. U. R. Friend, How to write a paper that receives as many as possible citations, *J. Improbable Res.* **123**, 456–478 (2006).
  - [2] S. Hawking, *A brief history of time: from Bing Bang to black holes*, Transworld Publishers, London (2011).
