Area of **Arts and Humanities**

COURSE

Studio Drawing Practice: Re-Mixing the Prado Museum

Step inside one of the world's greatest museums and see classical art through fresh eyes.

In this hands-on course, students work directly at the **Museo del Prado**, observing and sketching masterworks while developing their own contemporary reinterpretations.

You'll refine your drawing technique, strengthen your artistic voice, and learn how to connect classical tradition with modern creativity.

Perfect for students passionate about art, design, and visual storytelling.

COURSE

The Contemporary Art Market

Love art but also curious about how the art world really works?

This course explores the global contemporary art market — from galleries and collectors to auctions and international art fairs. Students analyze how creativity meets business and examine current trends shaping the industry.

Gain a deeper understanding of art not only as expression, but as a dynamic global profession.

COURSE **Digital Marketing**

Turn creativity into impact in the digital world.

This course introduces the fundamentals of modern digital marketing, including social media strategy, online business models, branding, web analytics, and digital communication tools.

Through practical activities and real-world case studies, students develop skills that are essential in today's fast-evolving digital landscape — valuable for future entrepreneurs, business leaders, and content creators alike.

COURSE **Intercultural Communication**

In today's global world, communication is everything.

This course helps students build confidence and effectiveness in international and multicultural environments. Through discussions, case studies, and interactive activities, participants strengthen their ability to connect, collaborate, and lead across cultures.

An essential skillset for future global citizens.

Tourism

Area

COURSE

Tourism Innovation Lab: From Idea to Impact

Have an idea that could change the way people travel?

In this dynamic, project-based program, students design innovative and sustainable solutions to real challenges in the tourism industry. Through field research, teamwork, and mentorship from professionals, participants learn how to transform creative ideas into viable projects.

The experience culminates in a professional-level pitch, where students present their concepts with confidence and clarity — just like real entrepreneurs.

Ideal for future innovators interested in sustainability, entrepreneurship, and global travel.

Engineering Area

COURSE

Future Tech Leaders: International STEM & Technology Innovation Experience

Explore the technologies shaping tomorrow.

This immersive STEM experience introduces students to high-impact fields such as artificial intelligence, cybersecurity, nanoscience, aerodynamics, nuclear engineering, augmented reality, and advanced vehicle systems.

Through hands-on workshops, lab-style sessions, design challenges, and prototype development, participants strengthen their engineering and problem-solving skills. The program also includes visits to innovation centers and leading technology organizations, connecting academic learning with real-world industry.

Beyond technical skills, students develop teamwork, creativity, and a global outlook – gaining inspiration for future academic and professional paths in science and technology.
