

Rectoral Resolution 2/20 COVID-19

THE RECTOR OF THE ANTONIO DE NEBRIJA UNIVERSITY, having attended to the request of the university community and heard the academic representation of the Governing Council, and taking into account the document agreed upon by the Spanish Network of University Quality Agencies dated March 18, 2020, and in view of the pandemic situation declared by the World Health Organization this month, with the intention of reducing the uncertainty generated in all students who study at this University,

ESTABLISHES

FIRST.- To maintain for as long as necessary the decision made at the time regarding the teaching activity of the entire University exclusively in a virtual format, thereby ensuring compliance with the prohibitions and recommendations issued by the competent authority, as well as the rights of students and professors.

SECOND.- To study and mediate as soon as possible in the measures that allow students with subjects of fundamentally practical content (areas of Sports Science, Fashion, Fine Arts, etc.) to maintain distance teaching and, where appropriate, complement the practical modules or parts where possible in order to ensure compliance with the expectations of knowledge, competences and learning, guaranteeing in

every case the possibility that these students be evaluated in the current academic year 2019/2020, and therefore avoiding that those who pass this evaluation have to enroll in these subjects in the next academic year.

THIRD.- Therefore ensure all students that their right to take their exams and be evaluated in this 2019/2020 year remains intact, both for those who are enrolled in distance or blended modalities, as well as those who, despite being enrolled in the class attendance modality, due to the present exceptional circumstances, are forced to carry out their studies in the distance modality. These rights will be exercised in the manner provided by the University in each case and according to the plan that will be communicated at the time, but always at a distance, while the exceptional situation in which we find ourselves lasts.

FOURTH.- Always encourage the responsibility and ethics of the true university spirit, so that these exceptional circumstances are not used to try to obtain academic results not adjusted to each one's own real merit. To this end, and in order to guarantee our educational mission even in circumstances as exceptional as these, complete or random checks required in the examination and evaluation processes will be carried out by all virtual means available at the University, in order to safeguard the integrity of the exam environment, in addition to the identity of the examinees

All of which is ordered, informing the University Community of the foregoing as of March 20, 2020, so that it takes effect on this date and until the exceptional situation that caused it lasts.
